Other Skills
- Team Collaboration & Leadership
- Problem-Solving & Decision Making

Certificates

- Certified Pega Senior System Architect
- HTML & CSS ⬀
- Programming Essentials in Python - NetAcad
- AWS ⬀

Projects

JobConnect – Job Portal Application ⬀
Built a full-stack job portal for job seekers and recruiters to register, post/apply for jobs, and manage applications. Used React.js for frontend with Tailwind CSS, and Spring Boot for backend with JWT-based authentication and role-based access control. Integrated mysql for storing user profiles, jobs, and applications efficiently. Resulted in a scalable, responsive platform that simplified job search and hiring workflows for users.

Event Management System ⬀
Developed an application to manage event creation, user registrations, ticket bookings, and event listings. Implemented a modular frontend in React and a RESTful backend with Spring Boot and MySQL. Enabled secure login, event filtering, and CRUD operations with form validation and real-time updates. Improved event organization and attendee experience by centralizing event data and interactions.

E-commerce Website ⬀
Created a user-friendly e-commerce platform for browsing products, adding to cart, and placing orders. Built the frontend using React with responsive UI components and connected it to a Spring Boot backend. Integrated MySQL to handle product inventory, user orders, and payment tracking. Achieved seamless shopping experience and demonstrated full-stack skills through dynamic content handling and secure checkout.
